Lotico (LTCO)

Description:

lotico.com is your gateway to an open community that shares a common interest in Data on the Web and the Semantic Web vision, a common framework for data to be shared and reused across applications, platforms and community boundaries. If you live, work or visit a location with an active community and you are interested to participate you are welcome to join.

Stakeholder(s):

Marco Neumann :

Lotico Local Community Groups

Berlin

Boston :

Organizer: Marco Neumann ~ Meet local people interested in the Semantic Web, an initiative by the W3C to make the web "one giant database": The Data Web. We address topics such as RDF, RDFS, OWL and applications that help to develop or already use ontologies, controlled vocabularies and rule systems in the enterprise and/or on the open World Wide Web. Furthermore we have a keen interest in business models for Semantic Web start-ups. The meetup format is very much inspired by my experience with foafcamp and unconference style community events. The Lotico Boston Semantic Web community is part of a global community that runs events around the world ...
